

We are looking for a

# Business Development Associate

at innovative Life Science Start-up project

We are looking for a highly motivated (under)graduate with business economy expertise to join a biotech spin-off. Our life science start-up project “BioMagnetix”, which emerged from the Department of Microbiology at the University of Bayreuth, is centered around biomagnets and aims to commercialize magnetic nanoparticles from bacteria for applications in the biotechnological and biomedical field (<https://www.linkedin.com/company/biomagnetix>). For this purpose, our team has already received EXIST start-up funding.

***Want to know more? Keep on reading and find our contact details below!***

## Potential responsibilities:

You will be supporting business-related activities, like e.g.

- Development of the business model
- Conduction of competitive intelligence
- Fundraising (e.g. grants, equity investment)

## Your experience:

- You are studying business economy, or have already a bachelor’s degree in a business-related area
- You are a team player and communicate in either German or English (fluency in both languages is a plus)
- You are enthusiastic about the Life Science industry

## What we offer:

- The start-up project is supported by experienced start-up builders, therefore, you will encounter guidance, purpose, and mentoring
- Career progression and growth: you will naturally become an important part of the team with growing responsibilities
- Network: your network and visibility will grow as the company advances to different phases of development, e.g., meeting potential investors and clients in the Life Science industry, etc.

## We caught your interest?

Please, send us an e-mail at [Frank.Mickoleit@uni-bayreuth.de](mailto:Frank.Mickoleit@uni-bayreuth.de) and briefly state your motivation to join us!
