myriad

Working Student (m/f/d)
User Experience Design

Homegrown vegetables are healthy and taste amazing, but growing your own can be a real challenge. We use space technology and AI to automatically grow plants in small spaces. Myriad develops efficient autonomous gardens so everybody can grow their own fresh herbs and vegetables at home.

Join our team and take on important and challenging tasks with plenty of room for your own ideas. There's also an excellent chance for you to transition into a leading full time role after finishing your studies.

Tasks:
- Work with manufacturers to create a captivating unpacking experience
- Design the UI and UX of our garden's software (touchscreen)
- Design a booklet that guides users through the first weeks

Details:
- 10h per week
- 500€ per month
- Up to 100% remote
- English

It's time to grow! Send your CV/link to portfolio to hello@myriadgarden.com
